

The Water Cycle Model

Due Date: _____

Total points: **40**

ABSOLUTELY NO LATE PROJECTS WILL BE ACCEPTED.

- Create a model that illustrates your understanding of the key components of the water cycle: (each worth 2pt)
 - Evaporation
 - Transpiration
 - Condensation
 - Precipitation
 - Surface runoff
 - Collection
 - Groundwater
 - Infiltration
- Create a Diorama with each of the components represented at least 1. Be creative!
- Make all pictures, diagrams, and representations by hand. No images may be printed from the internet.
- Include descriptive labels for each part of the water cycle. It should be clear what is happening in each visual and the force that drives that component (where applicable). (2pt for each descriptive label)
- 5pts awarded for creativity and cleanliness
- 3pt for being turned in on time.
